2. Two Different upload options for Event Banner and for Thumbnails

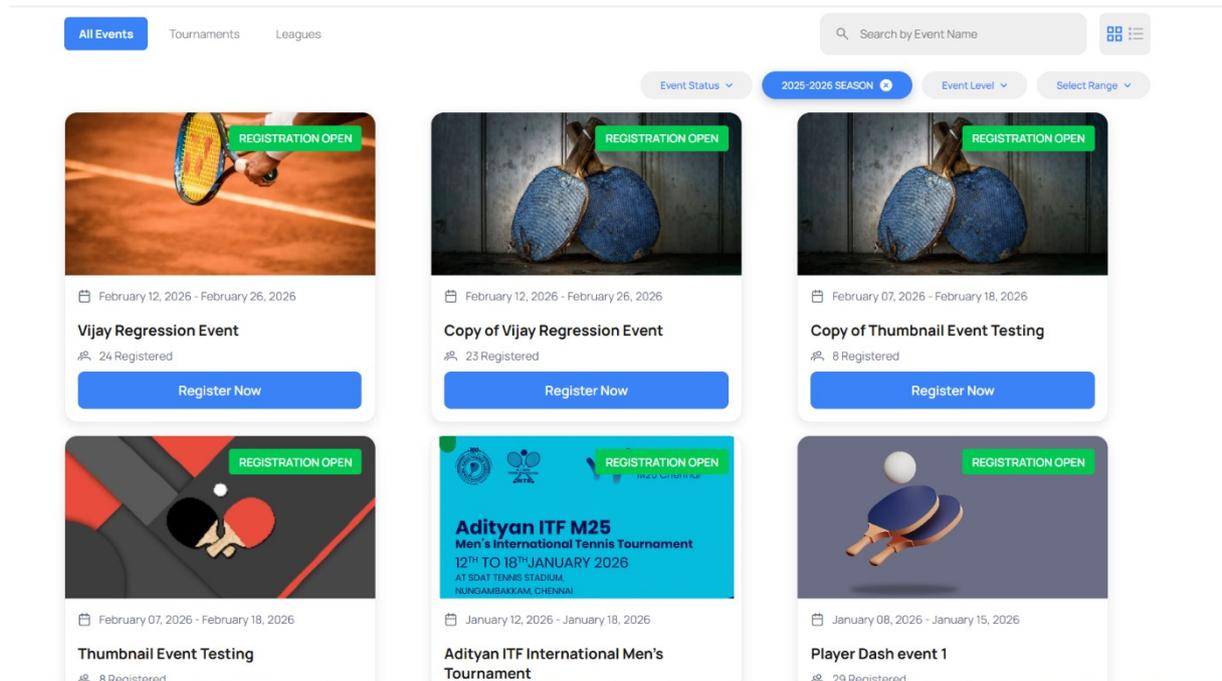

To improve visual quality and consistency across platforms, we have introduced a **dedicated Thumbnail Image upload option** along with optimized banner dimensions for web and mobile views. This update resolves banner distortion and blurred image issues across multiple screens.

Key Enhancements

- A new **Thumbnail Image** upload option has been added to the Event Details screen.
- Thumbnail upload is now **mandatory while creating an event**.
- The uploaded thumbnail will also be used as the **default thumbnail for Live Matches**.

For TMS and LMS:

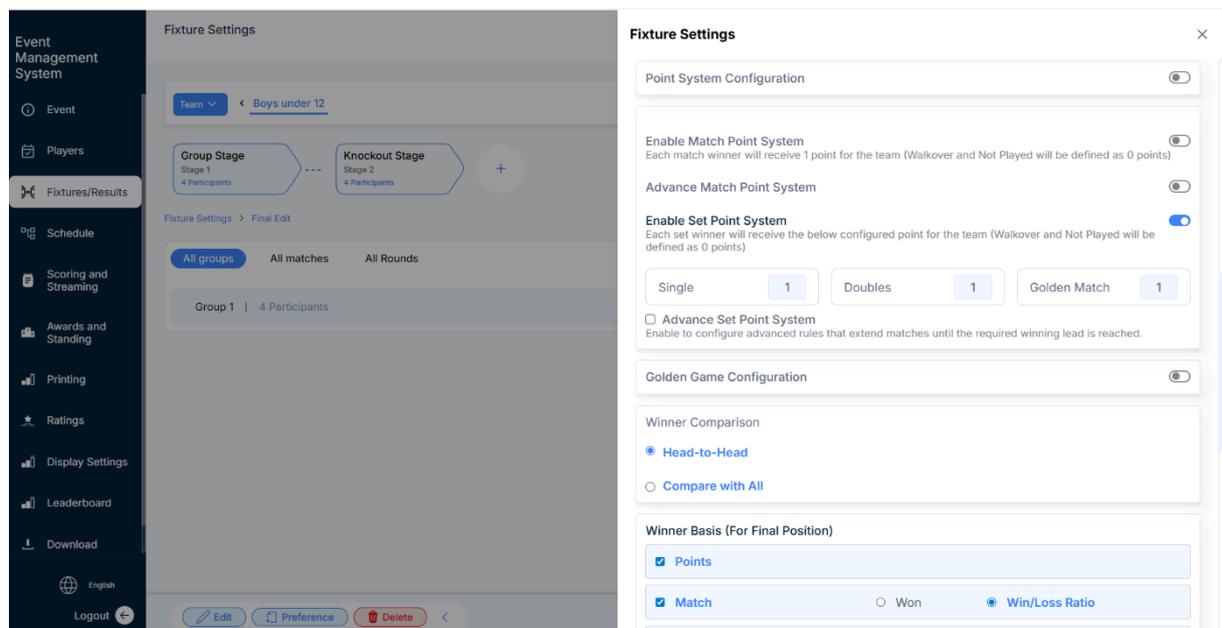

3. Set Point Enhancements

A new enhancement has been implemented to dynamically display **Set Points** based on the **Category Rule Settings**. Set points will now be shown across relevant screens only when the **Set Point setting is enabled** for that category.

- The system will automatically check category rule settings.
- If **Set Points are enabled**, they will be displayed across all applicable screens.
